Could this be the Chalmers Budget?

Summary:
Is this the biggest budget leak in Australian history ..... or is it the biggest fantasy? Does the ALP have the ticker for structural reform? This is the budget we have to have. Maybe it can help us stop the depression we certainly don't need to have.

The Budget We Need To Have..!!

Will Treasurer Jim Chalmers deliver something like this on the 25th of October?

My fellow Australians, our great nation is in grave danger. We are all living under a very sophisticated form of serfdom. The Kings and Queens of old - along with various religious and financial institutions - have persisted in the use of debt, taxes and the control of money to exploit and manipulate the populations that they continue to rule. **Trillions of dollars of wealth has been stolen from ordinary men and woman of the world for centuries.** Those who rule do not

© Bank Reform Now™ - Australian Non Profit Organsiation - campaigning to put a stop to predatory, unconscionable banking practices.

care about using deception, war, famine and disease against people if that is what is required to maintain their wealth and power. Corrupt political institutions masquerading as democracies facilitate this operation.

Equally sophisticated propaganda is used to condition the people to not only accept this state of servitude but to forget what it actually means to live in freedom. Some are now so scared of freedom that they risk the imminent imposition of an austere - authoritarian, cashless, surveillance state. This unique budget will help Australians free themselves from the dangerous future that the elite have been patiently and gradually putting in place. To seize this freedom and its resulting prosperity for you we will remove the power and privilege the elite rulers mercilessly hold and abuse.

As of now the Albanese government wants to **expose this crime against humanity and end the age of exploitation. Tonight we promise to usher in an age of freedom, justice and reform** - an age that will free you from the old divide, conquer, austerity and fear paradigm. We refuse to increase by trillions the debt our people owe to the banking cartel. What might happen were we to go down that track and our children and grandchildren ended up paying back debt with high taxes and a lower standard of living - perhaps for generations? I'm sure many Aussies would choose to leave the country to build a better life where that mistake had not been made.

Living in freedom demands we all take responsibility for our choices and actions. Freedom doesn't guarantee success and happiness but it does improve the odds for many more of us. It also means we should try and live a good life - a noble life - a life where we try to avoid causing harm to others. We commit to a simplified and affordable legal system with laws that **strongly encourage citizens to avoid the initiation of force, fraud and coercion in our relationships - personal and business. Freedom means you have fundamental rights and responsibilities. These are not negotiable.** They cannot be removed by devious politicians or misguided citizens. Your life is your life. Your property is your property. Your thoughts, freedom of speech and beliefs are yours. You do have a right to privacy and no corporate pirates should be allowed to steal it with their intrusive algorithms and bloatware **[see Bill Of Rights** link below for more details].

The society we now live in is not fit for humans to prosper in peace. Your family are human beings not livestock to be monitored, controlled and exploited. You are not registered assets existing to serve elite rulers. This budget shows you that a new way of living is possible if **the theft of your time, money and country is stopped.** Let me illustrate by discussing some of our biggest problems.

But first, an important warning - in the current worldwide turmoil people are struggling and fearful. The Albanese government commits to making sure that Australia remains a civilised free nation. To assist with this we will do what is required to protect the production and supply of energy, food, water and critical medical products. If the supply chains for these are allowed to fail there will be chaos, terror and destruction only seen during war time. And really - if government can't assist in a meaningful and sensible way to make sure these essentials are available at reasonable cost to all Australians - what good are we?

Mental Health

In traditional budgets governments would promise to throw an inadequate amount of money at this problem. - more psychologists, psychiatrists and psychiatric hospital beds. Of course we should have quality services easily accessible for those in need. The issue is - why are so many suffering? Could it be that modern life is harsher than it need be? Too many children are suffering from emotional (and often physical) neglect. Their parents are struggling to provide a home and other necessities. Why are so many missing meals? Why are so many living in fear with drug and alcohol affected carers? Poverty is a key issue but the "well off" also struggle to maintain "the good life." People with good jobs often have high debts to maintain a lifestyle which facilitates the enrichment of the elite. The programs we announce tonight will take the pressure off because we will stop the fleecing of the country. **People will be able to meet their family's needs with perhaps half the amount of paid employment that is currently required.** No family will live in poverty because we can guarantee a fairly paid job for all. **Our primary focus here is to prevent a suicide crisis that is inevitable in response to business failures, job losses and cost of living pressures.**

A Job Guarantee

Meaningful work is good for people. On the other hand meaningless work is soul destroying and a waste of time. The rulers want everyone in paid work because they can be taxed. It doesn't matter if the job is useless or provides goods and services that are unnecessary or even harmful. If a family could live well on twenty hours or so of paid work each week a mum and dad could share looking after the kids. They wouldn't need to pay someone else to do it. **The rulers get a cut of every transaction.** They want you and your childcare provider – and everyone else working long hours. GDP calculations and the perpetual growth fetish are a con [see **Gross Domestic Well Being** link below]. The changes we announce tonight will lead to most people being able to work less paid hours. Useless jobs will disappear. The good jobs that remain will be shared. We are on the way to the biggest economic downturn since the Great Depression but this time - as the private sector sheds jobs there will be no need for a dole payment.

A Job Guarantee is a federally funded, locally administered program that offers anyone willing and able to work a community job at a socially inclusive minimum wage. That wage is fixed for all and if a higher wage is desired people will have to switch to a private sector job as the economy recovers.

This eliminates involuntary unemployment, sets a floor price for labour below which we deem employment to be exploitative and ensures a minimum standard of living below which we deem people to be unable to meet their reasonable needs.

Rather than the rulers taking their cut - a civilised free society can afford to provide a Citizenship Dividend to every Australian. The Job Guarantee is just one of the three components.

Taxation

More good news tonight. **The Albanese government is sick of the bank scandals and misconduct that has plagued the world.** We do not tolerate corruption in business or government. We are all about structural reform. Tonight we commit to tearing down the debt based economic Ponzi scheme that purports to be a finance system. This will **significantly limit the role and need for taxation.** We will have systems in place to prevent the excess printing of money. At various points we may also need to remove money from the economy via taxes to avoid inflation. We must always remember that Australia's wealth is not plastic notes and computer stored digital dollars. Our wealth is the nation's natural resources and its people. As long as we manage our money supply carefully and take that into consideration our economy will be stable. There are several simple background taxation systems we will implement when required. What we can promise tonight is that there will be no need for collecting receipts, drawing up depreciation tables and filling out a multitude of complex forms. What you do with your money is your business .... not ours - that's just one benefit of living in freedom.

We are breaking the paper chains that have tormented workers and businesses for decades. No Australian business will be required to pay an accountant to satisfy unreasonable, intrusive and pernicious bureaucratic “obligations” and requirements. No GST. No BAS, No CGT. No FBT. No payroll tax. No stamp duty. No superannuation taxes. No excise taxes. No income tax. No land tax. Your property is your property. Just imagine what that means. You will be able build or buy a home much more cheaply than previously possible [see **Housing Affordability** link below]. **Imagine your home being owned by you - free and clear.** No debt owing (once the relatively small loan required is paid off in a reasonable time) ..... and no need to pay rates or taxes on it every year. You will no longer be paying any form of “rent” to exist in this country and on this planet - another dividend of living free.

Our program will see investment flow to productive businesses. We do not support or allow government and bank created housing & asset bubbles.

All this is possible because we will stop the systemic and systematic fleecing of your family and country.

How can the Albanese government do all this? **How can we afford to protect the Australian people and economy without perpetual taxation and a trillion dollar debt that will never be repaid? How can we fund world class infrastructure for our people?**

A Sovereign Monetary System

Tonight we announce the formation of the Australian National Bank. Our nation, just like many others, is able to supply the money and credit required for its people. All nations must pull out of the BIS/IMF/Federal Reserve Bank system. The debt based system is the major tool used to exploit all nations. It is also a key plank of the "rules based international order." We will fund essential infrastructure programs without debt to the private banking cartel. Education will be free to every Australian. This is the best way to give our kids a fair go and a good start in life. What a crime to see graduates start with massive debts. Those who rule want every person and country in debt from cradle to grave and beyond. We say .... NO MORE..!! **Credit Creation is the goose that lays the golden egg. It is a critical national resource and the private banks must no longer profit from it. We bring it back to the people.**

Our government opposes a Central Bank Digital Currency (CBDC). It is the final nail into the coffin of your freedom and privacy. Tonight we are putting a stop to the CBDC pilot program announced by the Reserve Bank in September.

In the fight for freedom if the most you have to do is stop using your phone to pay for things you're extremely lucky. Decrease the use of credit cards right now. Get some cash every week from your bank or an ATM. As of today we will begin implementing a National Australia Post Savings Bank as the first step toward a properly functioning Sovereign Monetary System.

We are also tonight introducing Glass-Steagall type banking laws - the repeal of which in the USA by Bill Clinton was a major factor setting the scene for the Global Financial Crisis. The aim is to separate ordinary commercial savings bank functions - of use to most families - from the risky and often dodgy investment banking which the big banks use to line their own pockets. The bankers' casino is now ..... closed!

A Sovereign Wealth Fund

In addition to bringing home the bacon - and the egg .... we are bringing home the gold. We are tonight setting up a Sovereign Wealth Fund. **The first deposits will consist of repatriated wealth.** All countries can do this. For Australia it means wealth that has been stolen is brought back to the country - for example the British Royal Family and the Crown will have to divest itself of all property holdings in Australia. This includes land and shareholdings in Australian businesses - including banks. What else would contribute to the Sovereign Wealth fund? How about a fair payment for the mining resources that the people allow various companies to develop?

The Peace Dividend

When Australia and other countries successfully free themselves other nations will follow suit. Authoritarian rulers will of course object but free people are more content and less prone to manipulation. Only corrupt rulers can lead oppressed and fearful people into war. There will be no taxpayer funded war machine to enrich the merchants of death and destruction. We do not want companies and banks profiting from the manufacture, sale and use of weapons of mass destruction - nuclear, chemical and biological. Of course we seek to make engagement in those industries a crime against humanity - our **Peace Maker** program.

We are no longer going to put in place schemes and programs that are designed to coerce businesses to take on more and more debt. The system described above will encourage businesses and people to invest on the merits of the project or business venture. No longer will businesses structure their affairs to get taxpayer funded payments, subsidies or tax breaks. **This is how we can unlock genuine entrepreneurship and investment.** Of course we treasure Australia’s natural blessings so while we encourage job and wealth creation we do not want industry to damage

© Bank Reform Now™ - Australian Non Profit Organsiation - campaigning to put a stop to predatory, unconscionable banking practices.

our wonderful environment. Businesses are required to operate in a manner that maintains our clean soil, air and water assets.

Australia is a wealthy country - no-one should be going hungry and worrying about having a roof over their head. With the reforms I have announced tonight we will together build the most prosperous and free nation on the planet. We will step up and play a role on the global stage. **The exploitation of men, women and children must be stopped. A fundamental step in that battle is to see our freedoms, rights and responsibilities cherished, respected and honoured not just here in Australia but right around the globe.**

Our institutions have let us down. People do not trust government anymore. They certainly don't trust the upper echelons of the banking and finance sector who have repeatedly been found guilty of unconscionable criminality. The natural response is to decrease the power of politicians to cause harm and interfere with the rights, freedoms and responsibilities of the people. Of course to live in freedom people need to step up to the challenge of looking after themselves, their families and their communities. When people no longer need to work 40, 50 or 60 hours per week to feed and house themselves they will have the time required to do just that.

BRN knows that treasurer Chalmers is looking at using a Well Being Index of some sort. We suspect deep down he would love to announce major reforms as discussed above in our “fantasy” speech but unfortunately right now – just like the LNP – the ALP are minions of the rulers. The government is engaged in population control on behalf of the empire. As is the media, education system and various NGOs. Really the only way to make changes of significance is for people to get off their knees and take a stand in a united manner to make it right. It is time to end the age of Empire. The war drums are beating …… now is the time to become educated, motivated and activated. Take action. More about what needs doing soon.
