Coercive Predatory Capitalism - Will we wake up in time?

Definition: Coercive Predatory Capitalism (CPC) – the root of all evil: **An economic system which creates economic activity of no use or benefit to the people forced to pay for it.**

At its worst - whole industries are created and manipulated to rob and harm people and their countries. Examples include:

> Ultra High Processed (UHP) Foods - this not just fast food franchises. They consist of industrial food

© Bank Reform Now™ - Australian Non Profit Organsiation - campaigning to put a stop to predatory, unconscionable banking practices.

substances and cosmetic additives. Many packaged foods from supermarkets are full of various harmful chemicals and processed proteins, and fibres - avoid them. Examples include flavoured yogurts, processed sauces, and meats, packaged bread, and breakfast cereals.

> Seed Oils and other unhealthy fats such as Trans Fats, and margarines.

> Banking services based on exploitation of depositors and borrowers. Reform begins with an Australia Post National Savings Bank.

> Certain insurance products

> Certain investment products including for profit superannuation

> Accounting and law - the creation of complex laws and regulations force citizens and businesses to engage some in these professions to satisfy the myriad of imposed obligations. The size and cost of the government required for creating this over-regulated environment is also increased.

> War and conflict - including military deals that steal a nation's wealth - for example AUKUS. Another example is America bombing a Middle East nation for no legitimate reason and then sending U.S companies to rebuild the cities .... and steal the oil!

> Pharmaceuticals - at its mildest it is medicalising normal human issues and problems to find a drug for "treatment." At its near worst it is the deliberate sale of harmful "medicines." At it's worst it is the deliberate causing of illness and then selling expensive AND harmful pharmaceuticals as treatment. Living in a pathological society with harmful foods, pollution, mental health stresses creates illnesses which increases demand for "medicine." UHP foods generate profits long after their sale and consumption.

> “Low CO2 Emission” technologies and behaviours. This is the textbook example of CPC. Of course we should insist that industries should not pollute the air, water, and soil. However - low pollution operation costs industry so governments often allow dirty and unhealthy production. Energy security at low cost is critical to survival. Starvation and war will result from ruler initiated manipulation and sabotage of energy supplies.

> Mainstream Media - is really just the propaganda outlet of the ruling elite. At it's mildest it distracts and titillates the masses while keeping them ignorant. At its worst it will foment hatred and war. False flag operations are given high rotation coverage until populations are virtually begging to go to war against the "enemy" of the day.

> The Intersectionalism / Grievance / Division Industry - Divide and conquer is nothing new. The rulers want populations confused, distracted and frightened. They need people fighting among themselves over diversionary issues. Populations must be divided: Left/Right, Man/Woman, Gay/Straight, Liberal/Labor, Republican/Democrat, Worker/Boss, Black/White, Christian/Muslim. We are all human beings trying to look after ourselves and our families in a world which has been deliberately distorted to suit elite interests. Key rights are universal. Kindness, respect, understanding, and tolerance regarding minorities should be the default human position. A lot of money is stolen from citizens to fund this industry. In Australia it is hundreds of billions - if not trillions - of dollars.

> Education system - including compulsory and manipulated tertiary studies. Forcing young people into unnecessary higher education to study many Mickey Mouse courses of minimal value to them or the community. The aim being to increase profits for “universities” while having people indoctrinated into the latest politically correct narratives. The system is also bringing in migrants who are paying for courses of no use to them. It's another way of boosting GDP while the living standards of a nation goes backwards.

We are not claiming that the entirety of these industries are useless and harmful (well we are saying that for the UHP Foods and the vast bulk of military spending) but a large portion of them have been corrupted to fleece populations and enrich the rulers.

People should not allow advertising and propaganda to manipulate them into voluntarily putting money into these sectors. Plus they should definitely not allow politicians to take their money via taxes and debt to be transferred into these sectors.

A national government working in the country's interests would prioritise key issues such as: food security; housing security; resource security; energy security; cash transaction security; essential medication security; water security; air, water, and soil care; and government integrity including: political donation & advertising reforms and effective anti-corruption mechanisms.

Most politicians "forget" that it is a privilege to be a trusted public servant of the Australian people. They are not elected and paid to deceive people, to work against the country's interests, and sabotage the people's fundamental rights & freedoms .... or to steal from citizens.

The major parties refuse to tell the truth! They want people to believe that their shallow promises will make the world better. Consider the war, chaos, and cost of living crisis before deciding how much one can trust a politician's promise.

There are only 3 ways to really improve one's standard of living:

1. Improve one's productivity in the currently held job.
2. Improve one's skills and find a better paying job.
3. Steal from someone else or get a thug to do it on your behalf (usually considered illegal ... except it seems when the rulers do it via the governments they use to manage their livestock).

Actually - there is another way to improve people's standard of living.

Have the government serve the country's interests rather than those of the rulers who are stealing the wealth of the nation and its people. These are the types of policies an effective government working in the population's interests would put in place:

1. A Sovereign Wealth Fund
2. A Sovereign Monetary System
3. A Citizenship Dividend
4. A Bill of fundamental rights & responsibilities - starting with Life; Liberty; and Property (including Digital Rights)
5. Shutting down the war machine
6. A fit-for-purpose judicial system
7. Political Donation & Advertising Reform

Any other way of "improving" living standards or "decreasing" the cost of living will cause inflation! A point well demonstrated by Albanese and his predecessors. Poor governments and their poor polices are killing the country!

From now on **VOTE 1** for an Independent or Minor party candidate that supports good policy. If the major parties were working for the benefit of citizens and country most measures of well-being would be much better now. Surely the promises of "better schools, roads, housing, and hospitals" would have been sorted by now ..... especially in one of the richest countries in the world! Australia should have top class infrastructure and services already! All without the need for exploitative debt and taxes.

The reason politicians seldom keep their promises is that Australia is not a sovereign nation! The country has been designated by its rulers: a tourist Mecca; a money laundering hub; and a quarry supplying cut-price resources to be extracted for processing and value adding offshore.

Central bankers are a major tool of population exploitation and they don't want representative governments to interfere in their plans - including getting rid of cash with a Central Bank Digital

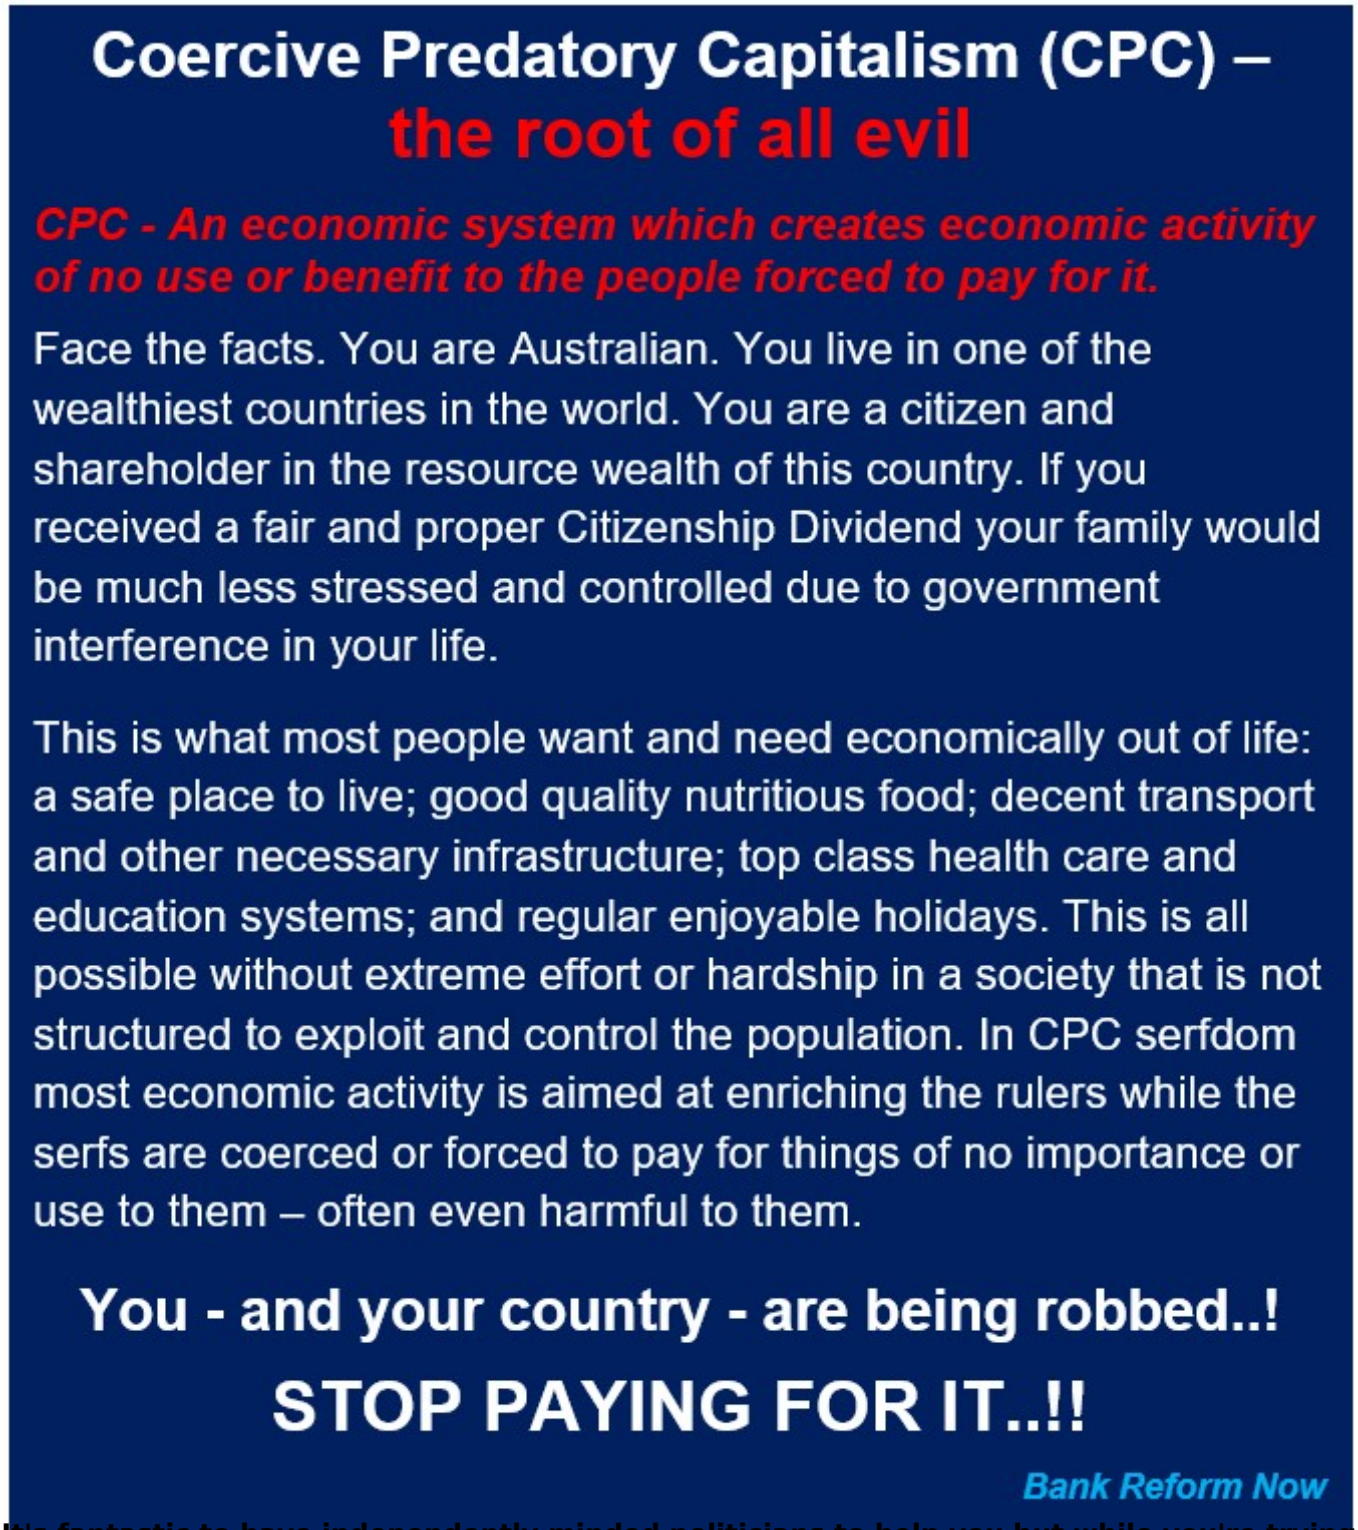

Currency. The bankers are constantly attacking what little sovereignty the country has left.

It's time to get serious. Let's Stand - Unite - & Make It Right!

To counter CPC - populations need to make sure corporations and government can no longer use force, fraud, and coercion in their dealings with citizens. In addition the fundamental rights, freedoms, and responsibilities must be respected, cherished, and celebrated. See links and attachments below for more information. Populations need to reclaim sovereignty over their nations and their resources. It can be done with some hard and smart work. Start with picking your government representatives wisely. Meanwhile the **Preservation Guide** below shows you what to do right now.

Coercive Predatory Capitalism (CPC) –
the root of all evil
CPC - An economic system which creates economic activity of no use or benefit to the people forced to pay for it.
It is steps further than fascism and even crony-capitalism. It's not just big government working closely with big corporations to exploit & control populations.
Property rights are destroyed. Money & property are seized by law & regulation from citizens & small businesses.
Citizen's money & debt are used by corrupt governments to purchase products & enact programs that would never be agreed to by the robbed citizens.
This type of economic activity boosts corporate profits & GDP but leaves citizens worse off with less freedom & wealth and less useful community services & infrastructure.
Political parties & politicians of course get a cut via kickbacks, donations, and post politics "jobs."
What is the solution? First step - Respect & protection of fundamental rights: especially the Right To Own Property.
You - and your country - are being robbed..!
STOP PAYING FOR IT..!!
Bank Reform Now

It's fantastic to have independently minded politicians to help you but while you're trying to find them here's what YOU can do right NOW!

Your Self - Country - Freedom Preservation Guide

1. Use **cash every day** for as many of your purchases as possible.

2. Do not vote for any major political parties.

3. Only support politicians that support your **fundamental freedoms** and rights.

4. Continually work to improve your **skills and education.**

5. Try your best to **get out of debt** as quickly as possible. Do not use credit cards and other forms of debt for routine purchases – **save now buy later.**

6. Do not spend money on entertainment that pushes an agenda not in alignment with your values.

7. **Support small businesses.** Minimise your business with large corporations as much as possible.

8. Do not purchase an electric car.

9. Limit time on Social Media.

10. Do not waste time, energy and emotions thinking that there is something wrong with you or that you are not good enough.

11. Do not allow the rulers to create division amongst you and your brothers and sisters from right around the world.

12. Be very suspicious about what you see and hear in the mainstream media and the education system.

13. It is highly likely that whatever Bill Gates tells you is exactly the opposite of the truth.

14. **Do not ingest any substances that are harmful** or toxic. This does not only apply to alcohol and tobacco.

15. We must push for a **Digital Bill of Rights.**

16. **Limit your intake of sugar** and avoid artificial sweeteners.

17. **Exercise** at least 150 minutes per week.

18. Take some useful supplements daily – esp. Vit. C & D and the mineral Zinc.

19. Do not eat vegetable and seed oils or margarine style artificial spreads.

20. Only drink **properly filtered water.** Not tap or bottled water.

21. **Eat unprocessed foods** as much as possible.

22. Do everything you can to **end the war machine.**

23. Aussies getting **affordable housing** must be a priority.
